EXPERIENCE

Drexel University
Graduate Writing Consultant

Philadelphia, PA
October 2024 – Present

- Assisted students in developing and improving their written communication skills through use of brainstorming, drafting, and outlining strategies.
- Reviewed and provided constructive feedback to students enhancing their writing and evaluation skills.

Gamezone Ghana
UI/UX Designer

Remote
July 2020 – July 2024

- Designed and implemented responsive, visually appealing, and accessible user interfaces for web and mobile platforms, applying skills in UI design ultimately improving engagement and accessibility across devices.
- Utilised UX research to assess and optimise website's user experience improving navigation and user satisfaction
- Managed and updated website content including unavailable items, catalogs, and client galleries, ensuring brand consistency, functionality, and an engaging, user experience.
- Designed engaging promotional social media flyers and visuals in Adobe Creative suite, aimed to maintain brand consistency, communication, and boost social media engagement.

PROJECTS

UX Research: Diary study on users' interactions with AI
UX Designer / Collaborator

Drexel University, UX Research Methods
February 2025

- Conducted a two-week diary study to analyse user behaviour and experiences with mobile productivity apps, identifying key pain points and improvement opportunities.
- Designed and executed user-centered research methods, including participant recruitment, daily prompts, and thematic analysis, to uncover usability trends.
- Synthesised findings into actionable design recommendations, enhancing app usability and engagement through data-driven insights.

Temu Website Re-design
UI/UX Designer / Collaborator

Drexel University, Human-Computer Interaction
December 2024

- The aim of this project was to enhance the User Experience on Temu's website
- The main goal was re-designing Temu's User Interface to reduce clutter, enhance search filtering and improve the overall user experience
- We leveraged user research to explore options for improving Temu's website and Figma to prototype new solutions.
